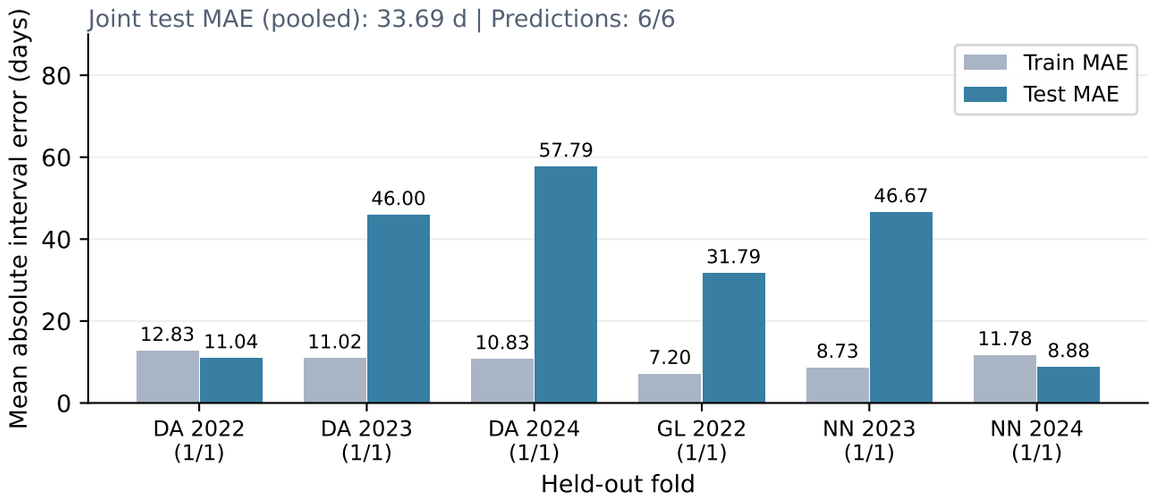
Joint VPD / I / beta TPE: selection comparison

seed = 123 | 1024 training trials per fold | six site-years

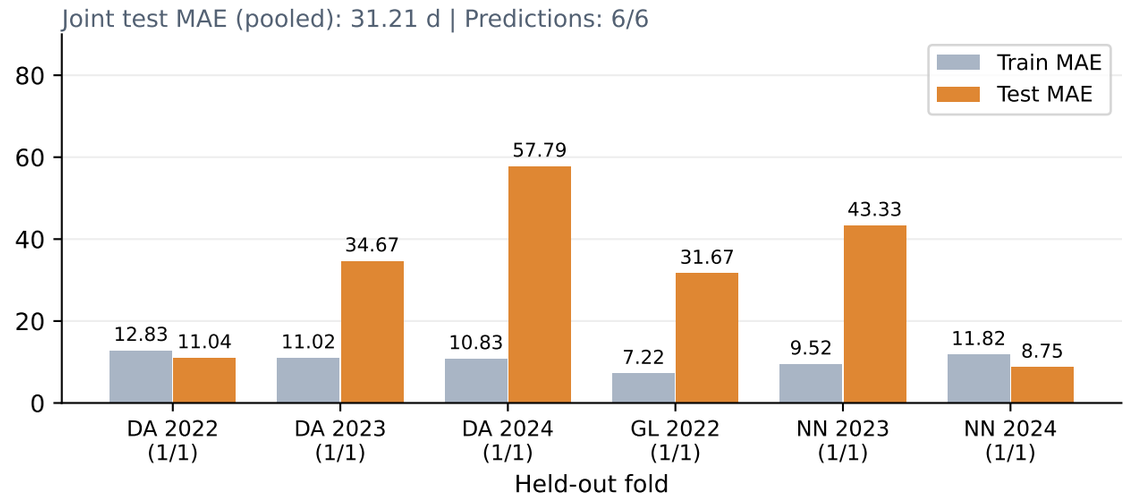
Minimum training MAE

Training MAE ≤ minimum + 1 day
Then minimum test MAE (exploratory)

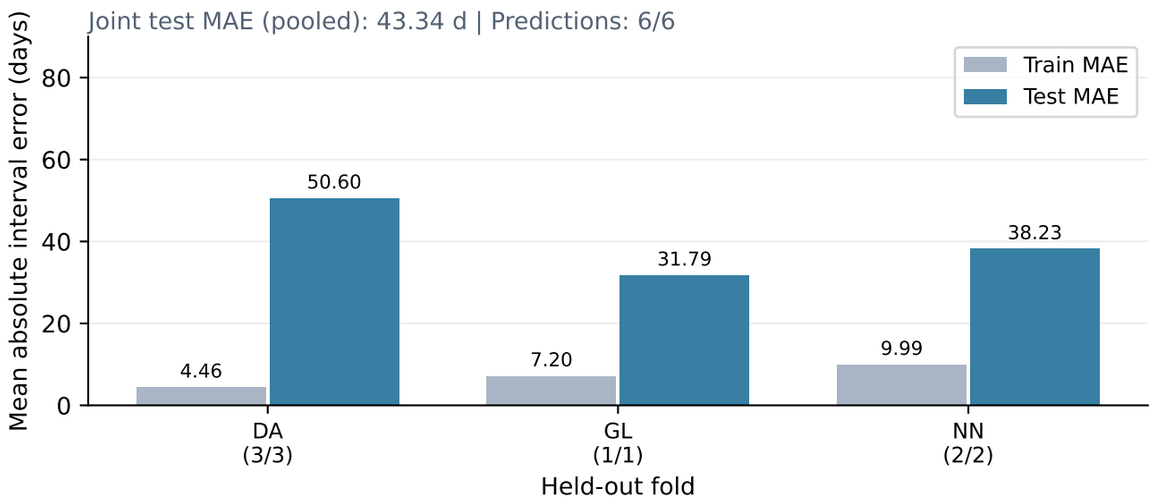
(a) LOSYO



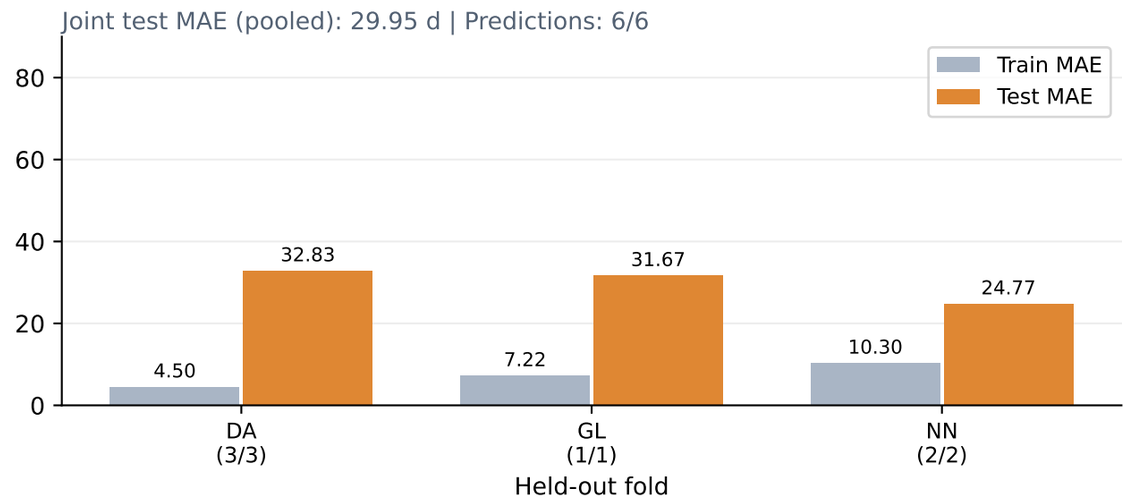
(b) LOSYO



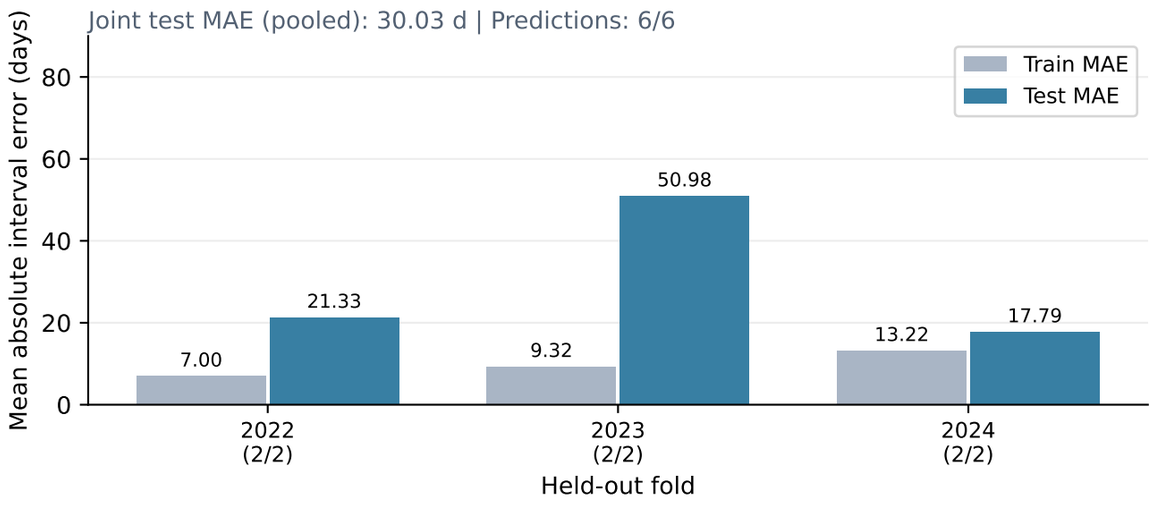
(c) Leave-one-site-out



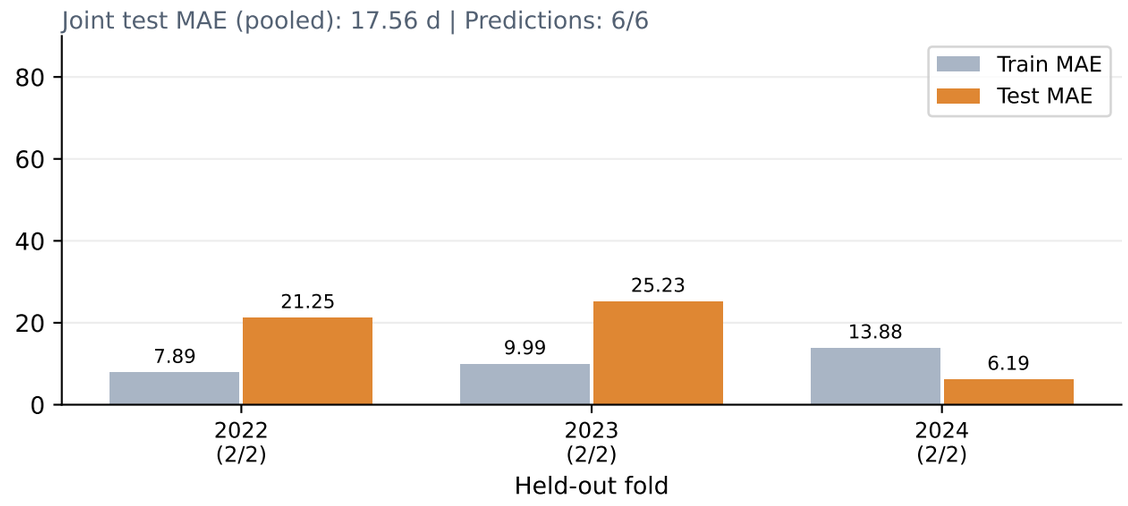
(d) Leave-one-site-out



(e) Leave-one-year-out



(f) Leave-one-year-out



Paired bars: training MAE (gray) and test MAE (blue/orange) for the selected parameters.
Parentheses: predicted / held-out cases; pooled MAE weights site-years equally.
Right column uses test outcomes for selection and does not represent independent test performance.
