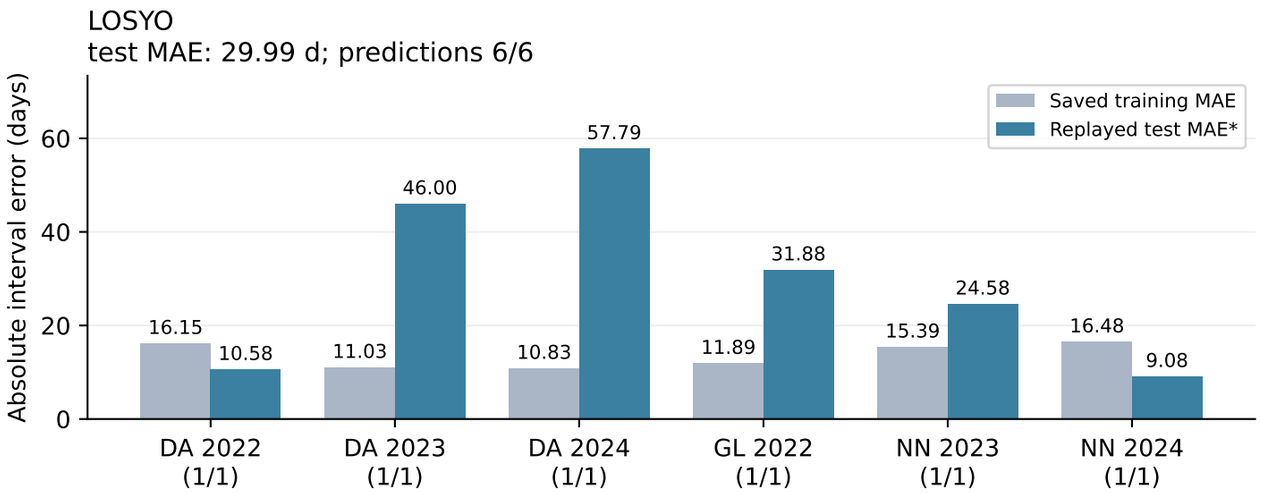
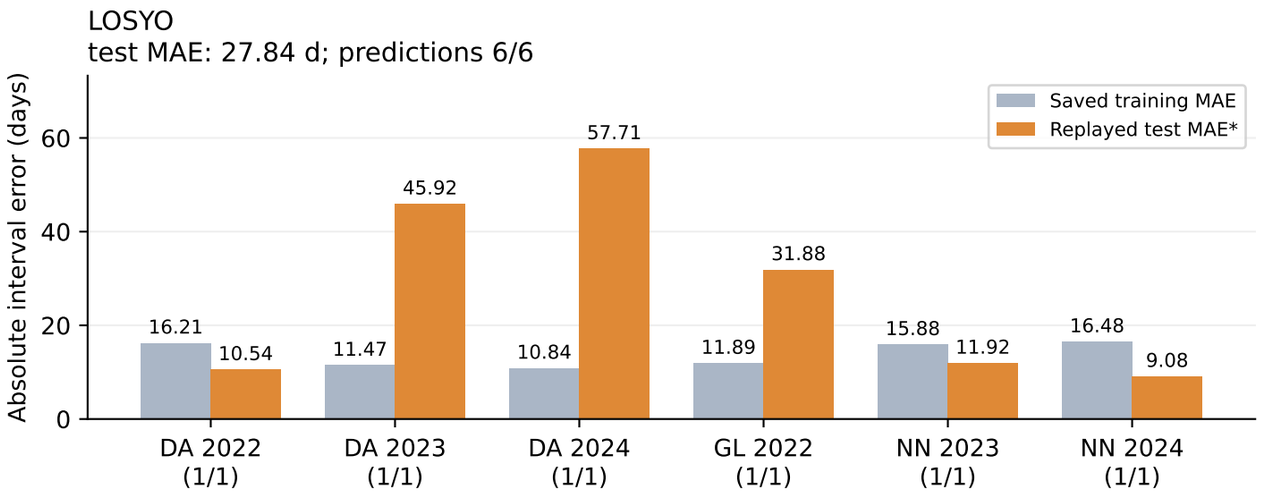
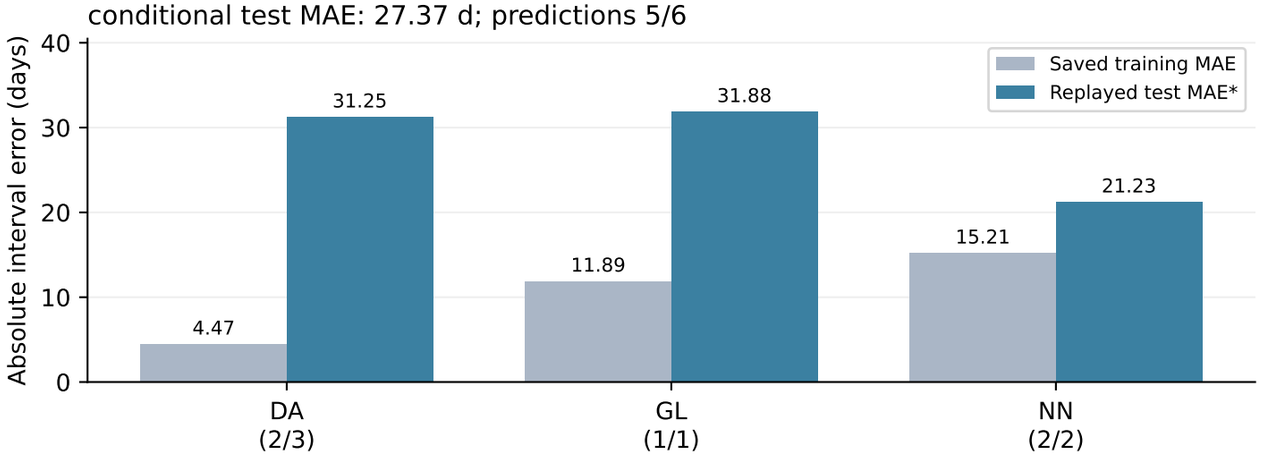
B fixed-parameter replay | 1024 original training trials per fold

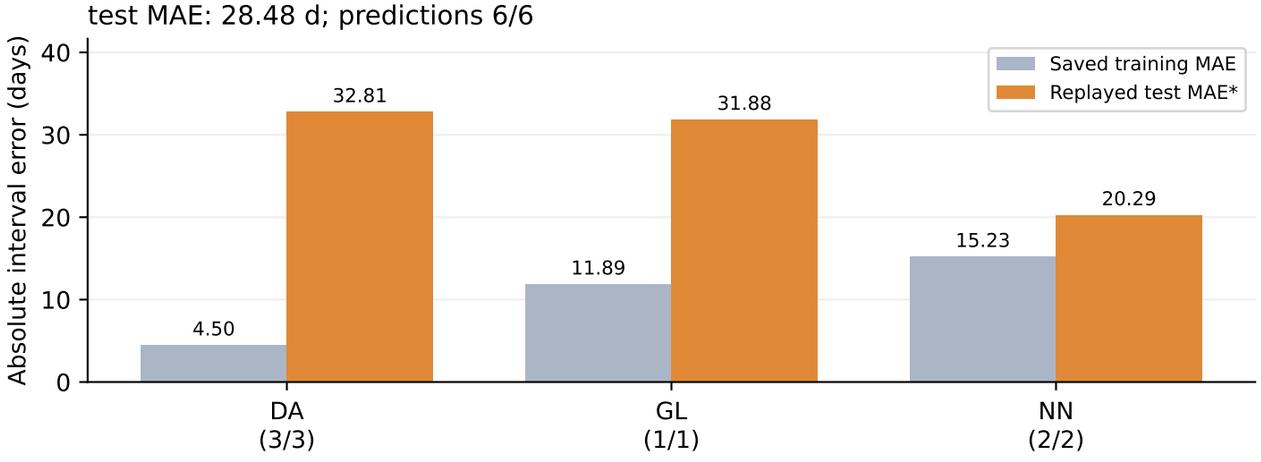
Minimum training MAE

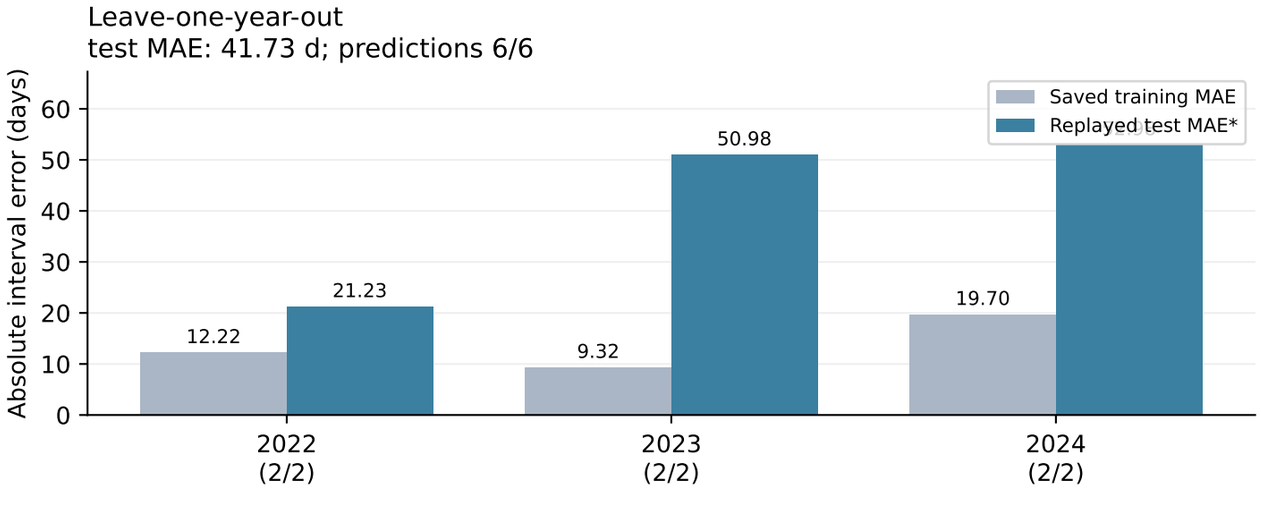
Training minimum + 1 day; then minimum test MAE
Exploratory: test outcomes used for selection

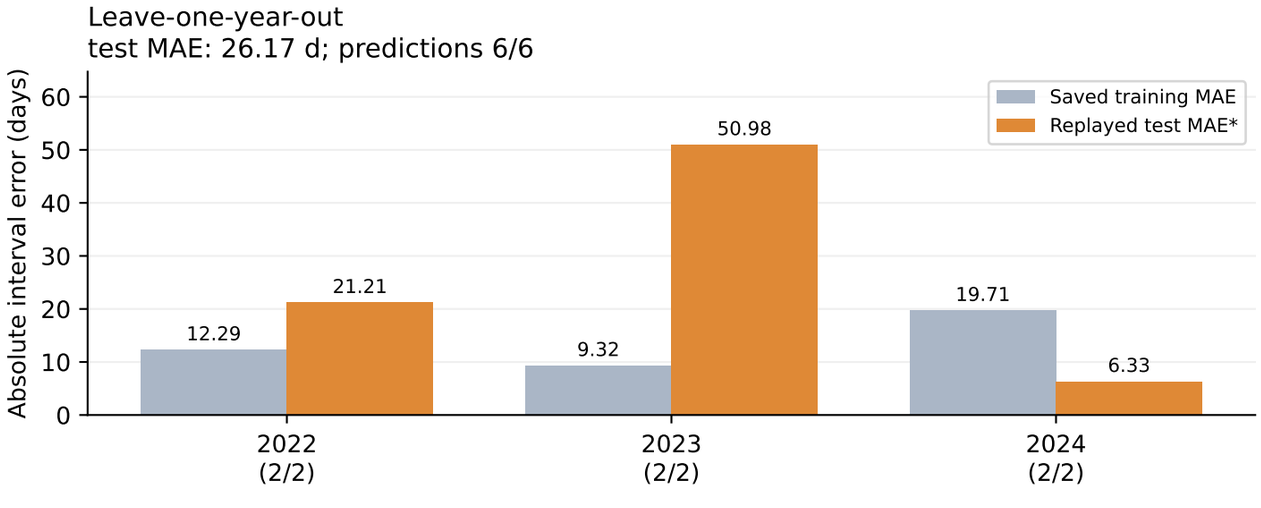












* Missing predictions are retained; incomplete test MAE is conditional on predicted cases.
Parentheses: predicted / held-out cases. Training bars use saved selection metrics; replay checks are in fold_summary.csv.
No new calibration or parameter selection. The right column is not independent test performance.
